EXPERIENCE

AHG Lab

October 2021 – present

Frontend

- Translates designs into high quality code
- Responsible for the restructuring of www.enta.ph
- Builds reusable components and frontend libraries
- Develops new fully functional features
- Responsible for the development and maintenance of www.enta.ph and www.rentalbee.ph
- Optimized web applications' responsiveness for mobile screens
- Reduced package dependencies by recreating components

AHG Lab

August 2021 – October 2021

Backend

- Single-handedly created a server application using Express.js, Node.js, and Mongoose.Js that tracks real-time traffic and data from the company's three main websites (www.rentalbee.ph, www.enta.ph, www.bedsandrooms.ph)
- Implemented multiple APIs such as Google Analytics API, Facebook Graph API, and Instagram Basic Display API

PORTFOLIO PROJECT

Ecommerce website

https://roy-furniture.netlify.app
Created a full-featured ecommerce store with authentication, cart management, and payment. Project is built with React, Auth0, and Stripe.
